FOR BEST RESULTS—FERTILIZE!

Although correct fertilizing plays an important part in crop production, the careful selection of the fertilizer you are going to use is equally important. All Fertilizers sold by Anderson's, of George Street, are well-balanced, obtained from the best sources, and of high analytical standard. For Potato cultivation, we would strongly recommend our Special Super No. 5. This is a quick-acting fertilizer, and the results obtained by growers are really marvellous.
